

— DOMÍNIO DA FREQUÊNCIA

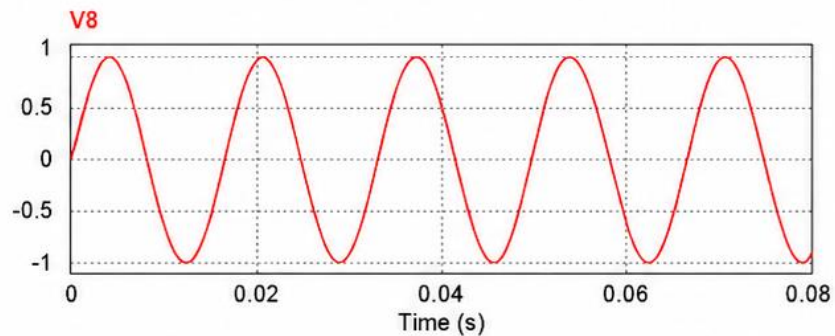

Prof. Tiago Davi Curi Busarello

Universidade Federal de Santa Catarina

Conteúdo

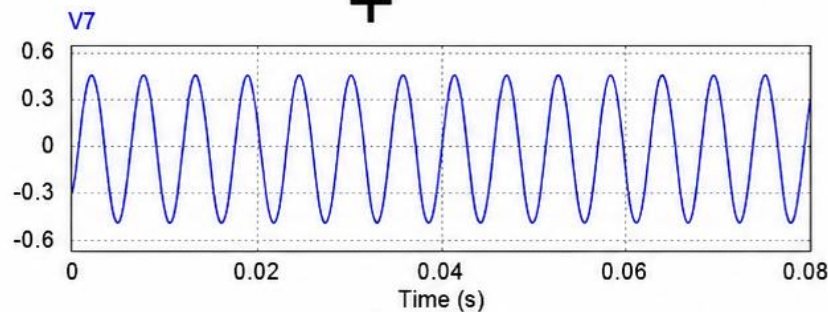

- Motivação para usar o domínio da frequência

C

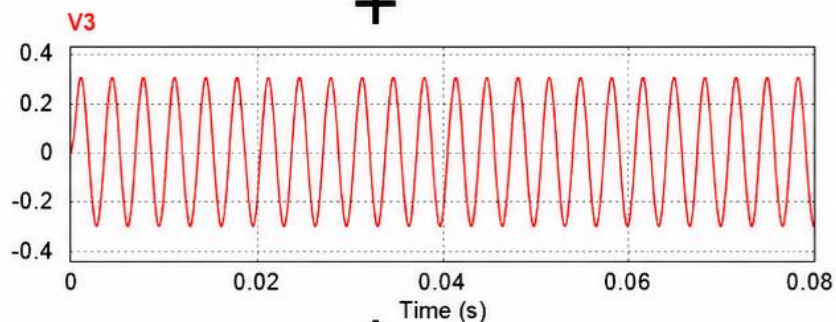

F = 60Hz
 Amplitude = 1V
 Ângulo (fase) = 0°

+

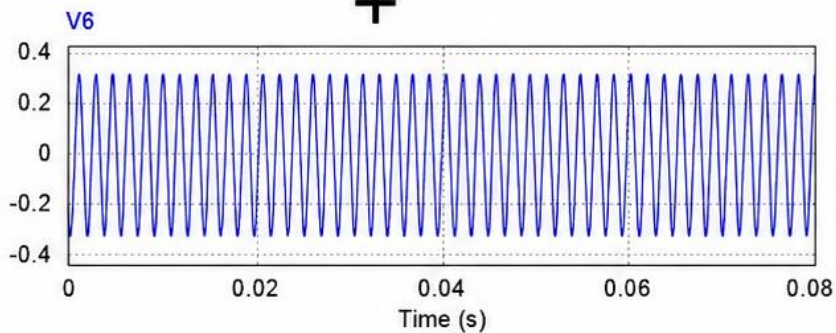

F = 180Hz
 Amplitude = 0.45V
 Ângulo (fase) = 0°

+

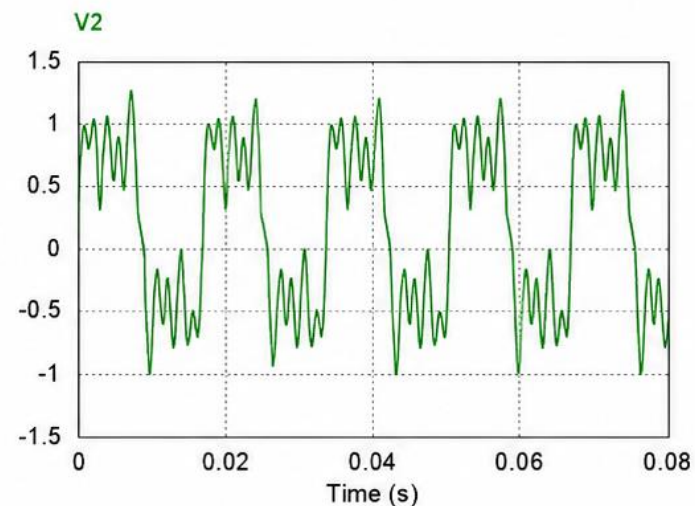

F = 300Hz
 Amplitude = 0.35V
 Ângulo (fase) = 0°

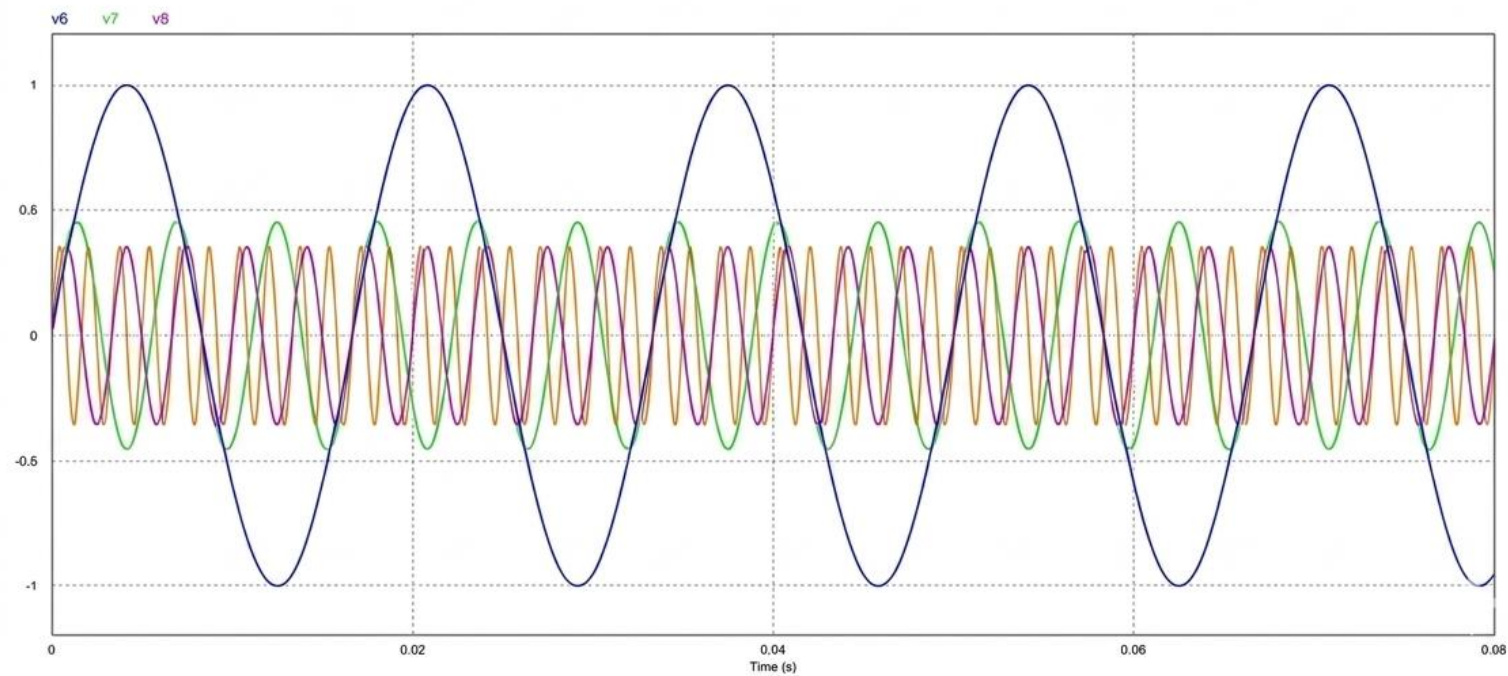

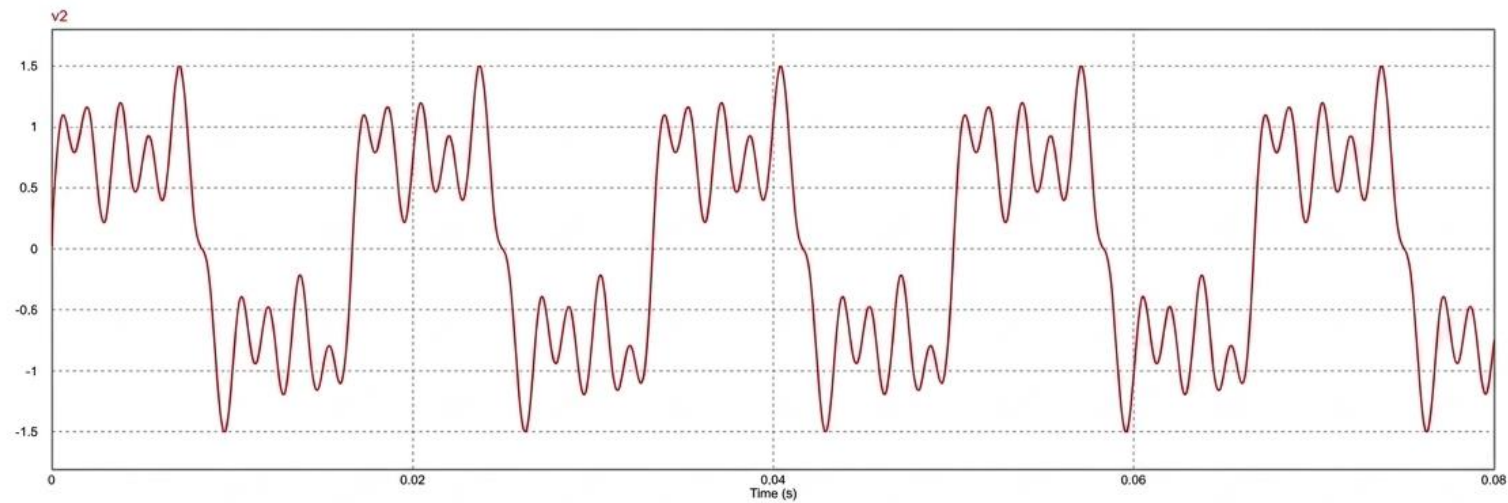

+

F = 600Hz
 Amplitude = 0.35V
 Ângulo (fase) = 0°

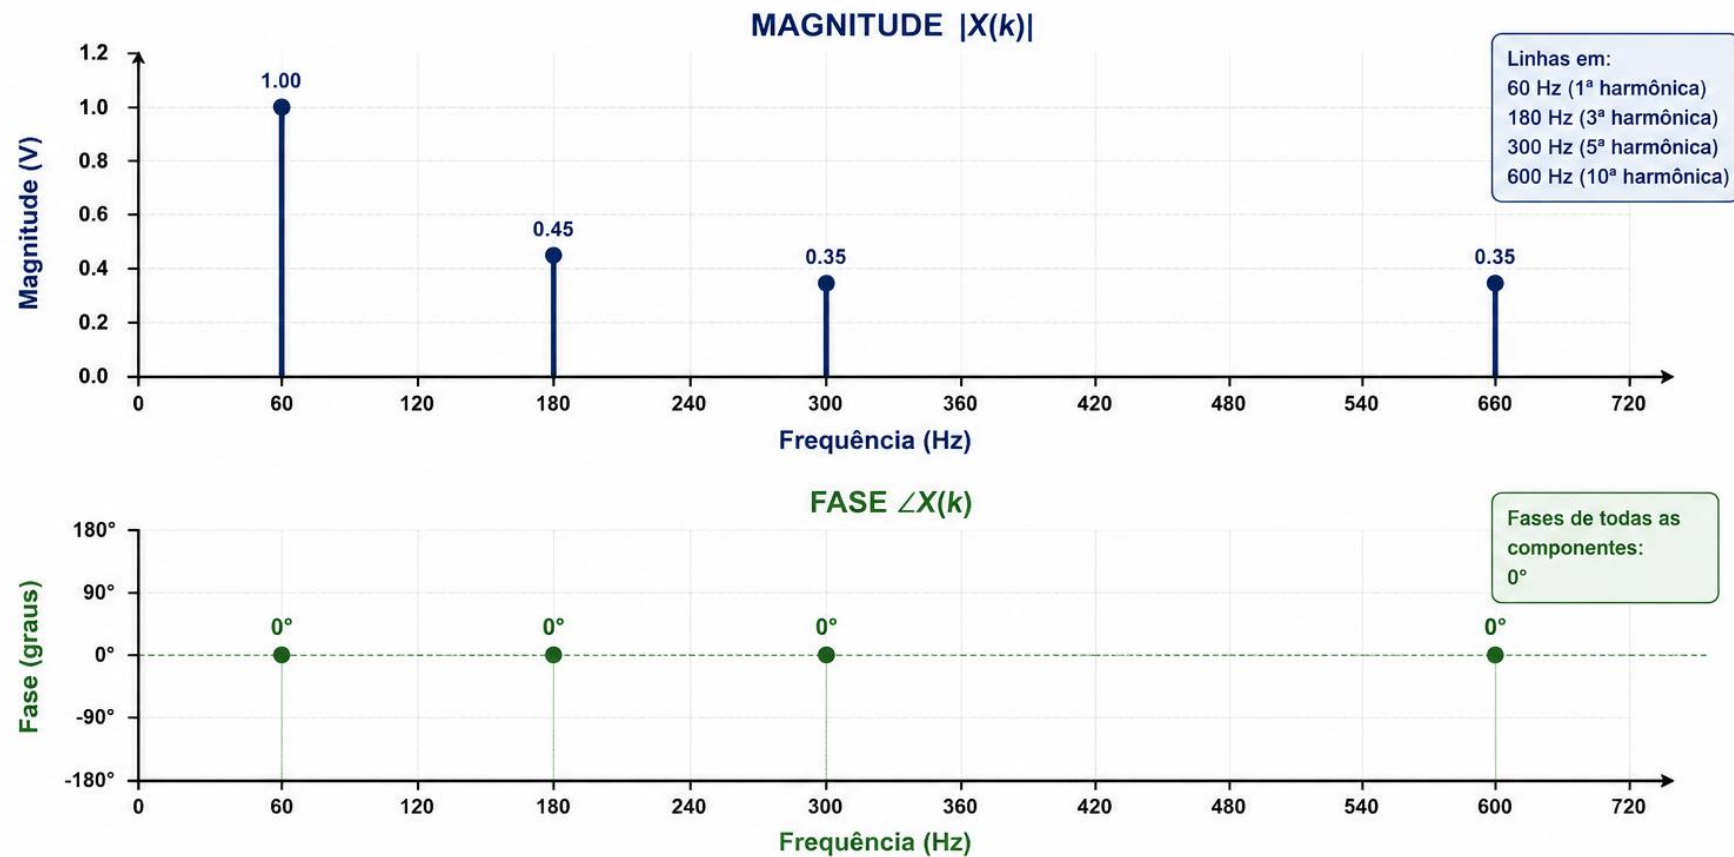

=

Espectro de Fourier Discreto

Sinais: 60 Hz (1 V), 180 Hz (0.45 V), 300 Hz (0.35 V), 600 Hz (0.35 V) – Fase = 0°

Resumo das Componentes Espectrais

Frequência (Hz)	Ordem Harmônica	Magnitude (V)	Fase (graus)
60	1ª	1.00	0°
180	3ª	0.45	0°
300	5ª	0.35	0°
600	10ª	0.35	0°
